DICAR F510 FINE CUT

DESCRIPTION

Fine cut Abrasive Paste for car refinish, formulated just to be used in polishing process on fresh or not fully cured surfaces or as final step after using Dicar H500 high cut abrasive paste.
It removes finer sanding scratches and swirl marks ensuring an excellent, homogeneous and high-gloss finish.
Versatile for hand or machine application.
Main characteristic which differentiates this paste from others products on the market is its capacity in reducing the polishing time after sanding, using one only product, getting a shining surface without holograms.

OTHERS CHARACTERISTICS

Water soluble

Odourless

It does not leave holograms

Ecological

It does not contain silicones / masking waxes

APPLICATION METHOD

Apply on soft wood pad (suggested) or medium-high hardness foam pad and start polishing.
Keep low speed to do not warm the surface by crosswise movements until the required result is obtained.
The last application must be done with higher speed to use all paste residuals.
Clean the surface with a microfiber cloth.
We suggest to complete using our Polish.

PROCESSES

Step 1 analyse the superficial defect and conditions of the surface
Step 2 surface preparation
Step 3 choose polishing process

PACKAGING

1 liter

BOX

12 x 1
